Working with your waterways

Free workshop and field trip for rural landowners
Learn to work with nature to protect your land and waterways while building flood resilience.

Join us for a free hands-on workshop to explore how streams and rivers shape the landscape and what that means for managing rural land in erosion and flood-prone areas.

Time:	Doors open 12:45pm, workshop starts 1:00pm
Date:	Saturday, 22 March
Location:	Whangateau Hall, 533 Leigh Road

We'll look at the science of how water shapes land in simple terms so you can better understand what's happening on your property and how to reduce erosion, improve water quality, and build resilience.

What to expect

- Engaging activities to show how land use impacts waterways
- Learn how to conduct a practical Rapid Geomorphic Assessment of a local stream
- Tips on how to manage sediment, erosion, and flooding risks
- A chance to ask questions and share your experiences
- Afternoon tea provided

Who should attend?

- Farmers, lifestyle block owners, land managers, and anyone interested in healthy, resilient waterways.
- This workshop is aimed at community in the north-east Rodney region - it seeks to bring together landowners from Whangateau, Leigh, Pakiri, Whangaripo, and Tomarata for an interconnected conversation.
